Web Interaction & Animation - Online

I chose a real estate website for my project. I chose it because I felt I could utilize the requirements most effectively. Also, my friend is wanting a new website for her business.

All of the images were ones that I took myself or were “labeled for reuse” on yahoo.com.

- A homepage  
`index.html`
- Two uses of jQuery effects in image gallery  
`.slideDown`  
`.slideUp`  
`.fadeOut`  
`.fadeIn`
- Check for features with Modernizr and provide fallback content for legacy browsers  
`bottom of gallery page in footer`
- Real content is need, Lorem Ipsum, will not be accepted.  
`copy given to me by realtor`

Please include at least 4 of 5 of the following:

- An Animated Bar Chart or Interactive Data Visualization  
`left of each html page`
- An Interactive Map  
`Charleston Area Map By Neighborhood on map.html`
- An Interactive Image Gallery  
`gallery.html page`
- At least one use of the HTML5 Video and/or Audio tags  
`home page on top left side`
