Web Interaction &Animation

Why not use Keynote?

What is the difference?

- Traditional presentation software can not accurately show web code and web coding concepts.

- Can not have live elements

Web Interaction &Animation

Online Presentations

What are they?

- HTML Framework written in modern web languages

  - Use the latest HTML5, JavaScript, and CSS transitions, animations and features in your presentations

- Delivered in web browsers & works on mobile devices

Online Presentations

What are some of the big ones out there?

- Reveal.js

    - This is one of the most common.

    - http://lab.hakim.se/reveal-js/#/

- Impress.js

    - Sort of like prezi

    - http://bartaz.github.io/impress.js/#/bored
